Unassembled

The unassembled bird comes on a flat sheet in a 3" diameter tube. You punch out the pieces of the kite and glue together (we recommend Jackite glue). It takes over an hour to assemble and comes with pictured instructions. The Cardinal, Blue Jay and Black Bird come in a plastic package and take a half hour to assemble. You will need scissors and a stapler.

Poles

	<p>The 16 ft Bamboo Poles are three sections that joint together. When apart the three sections side by side are 60 inches long. There is an eyelet at the top to attach a Jackite Line Rig or line of your choice.</p> <p>Cannot be used with the American Bald Eagle or the Giant Canda Goose but is perfect for all our other kites.</p> <p>7.00 ea</p>
	<p>The Fiberglass poles were designed with quality and price in mind. Jackite changed the standard for fiberglass poles in three ways:</p> <ol style="list-style-type: none"> 1) reinforced the butt section so it would not split 2) increased the wall thickness for less breakage, and most important 3) began to provide poles with a thicker tip. <p>Fiberglass poles are telescoping like an antenna. You extend the fiberglass pole out and twist the sections together to the desired length. For a shorter length pole, do not extend all the pole's sections. All fiberglass poles collapse to 46 inches.</p> <p>Jackite guarantees all it products for 90-days. But with the Fiberglass poles if you break a section of this pole will be replaced the broken section for a small fee plus freight. See below price list for sizes and pricing</p>
	<p style="text-align: center;">Platinum Poles</p> <p>Stronger poles which when extended can flex to 180 degrees for banners, windblades and windfeathers. Thicker wall for a stronger pole. This pole has a solid fiberglass tip section with a D-ring at the top and a hook on the butt section. Collapsed length 55 inches. Expect new colors next year. See below price list for sizes and pricing</p>

Flat Deck Mount

Mount this to any vertical post, like a deck or fence post.
Can be installed on the bumper of an RV, van or car.

Fits the 16' and 20' standard Pole and the 27' Platinum Pole
SPECIFY SIZE WHEN ORDERING

Ground Mount (For 13', 16', and 20' Poles)

Push or drive this ground mount into hard soil or sand.

This item requires a Ring; one comes free with your order. The Ring wraps around the Fiberglass Poles and snugly holds the pole in place. Rings for 13', 16' and 20' Poles.

Understand that different manufacturers produce poles of different diameters. If you have a different pole you may guess the ring and if not an exact fit alter the ring for best fit.
SPECIFY SIZE WHEN ORDERING

Ground Stake

14 and 16 Foot Bamboo Poles
13, 16 and 20 foot Fiberglass Poles

Ground Stake is a 22" piece of PVC pipe with an angle cut on one end. This pole holder can be pushed into soft dirt or sand. You insert Pole into this ground stake to keep the pole vertical for flying Birds like a windsock. The pole can be removed and reinserted into the pole holder for quick storage of poles.

SPECIFY SIZE WHEN ORDERING

Ladder Mount 13', 16', 20', 28' & 31' Poles

This mounts fits any 1" to 2.5 inch pipe or rod. Wrap the lips around the pipe and screw into place.

This item requires a Ring. The Ring wraps around the Fiberglass Poles and snugly holds the pole in place. Rings for Jackite Poles.

Understand that different manufacturers produce poles of different diameters. If you have a different pole you may guess the ring and if not an exact fit alter the ring for best fit.

SPECIFY SIZE WHEN ORDERING

Side Deck Mount

Made of metal and painted white.

Can be spray painted any color

Install on any vertical post like a deck or fence post. Install on a RV, car or van bumper.

Fits the 16', 20' & 27' standard Pole and the 27' Platinum Pole

SPECIFY SIZE WHEN ORDERING

Wall Mount

This mount can be screwed to any surface including wood, metal or block including fence post, cinder block walls or the side of a trailer or RV.

This item requires a Ring; one comes free with your order. The Ring wraps around the Fiberglass Poles and snugly holds the pole in place. Rings for 13', 16', 20', 28' & 31' Poles.

Understand that different manufacturers produce poles of different diameters. If you have a different pole you may guess the ring and if not an exact fit alter the ring for best fit.

SPECIFY SIZE WHEN ORDERING

Fiberglass Windssock Arm

This Arm is used to keep the line from wrapping around the Fiberglass Poles. This Arm does not fit the Bamboo poles and we are not sure if it fits other manufacturer's poles. To use, force the white plastic sleeve over the tip of the fiberglass pole. Attach the line to the loop at the end of the wire.

	<p style="text-align: center;">Kite Pole Kit with Accessories</p> <p>1 20' Fiberglass Pole (Green/Red/Blue) 1 Line Rig</p> <ul style="list-style-type: none"> • 7 feet of strong lightweight line with big swivels on each end. <p>1 22" Ground Stake</p>
	<p style="text-align: center;">150 ft of Line on Handle</p>
	<p style="text-align: center;">Line Rig - 7 ft strong line with swivels</p> <ul style="list-style-type: none"> • 7 feet of strong lightweight line with big swivels on each end. • For Osprey, Loon, Happy Gull, Dove, Eagle, or Goose Kites • Fly with pole 13 feet or taller. • Designed to minimize line winding around pole. • Attach swivel to top of your pole, and the other swivel to your Flying Bird.
	<p style="text-align: center;">Pole Rings</p> <p>Pole Ring for Standard Fiberglass Poles. Also fits the Platinum Poles. Fits tight in the mount and the pole does not wobble, fitting snugly! One comes free with any Pole Mount order (Wall, Ground, Ladder).</p>

General Information

- **Fly as a Kite, Windssock, Decoy or Scarecrow.**
- **Display as a mobile or use for a Decoy Actually attracts other birds.**
- **People will insist you have a bird tied to a String. Guaranteed for 30 days.**
- **Made in the USA Hung indoors or outdoors, it make an attractive decoration.**
- **High Quality, fade resist dyes used for imprinting.**

Poles

Fiberglass poles were designed with quality and price in mind.

Poles changed the standard for fiberglass poles:

- 1) reinforced the butt section so it would not split**
- 2) increased the wall thickness for less breakage, and most important**
- 3) began to provide poles with a thicker tip.**
- 4) The Jackite Fiberglass poles are telescoping like an antenna.**
- 5) You extend the fiberglass pole out and twist the sections together to the desire length.**
- 6) For a shorter length pole, do not extend all the pole's sections.**
- 7) All fiberglass poles collapse to 46 inches.**

Platinum Poles

Stronger poles which when extended can flex to 180 degrees for banners, windblades and windfeathers.

Thicker wall for a stronger pole.

This pole has a solid fiberglass tip section with a D-ring at the top and a hook on the butt section.

Collapsed length 55 inches

Expect new colors next year

Jackite, designers of unique Birds (Kites/Windssocks) that truly depict a bird in flight. They beat their wings, bank on the air emulating a real bird. Fly outside your store like a windssock for added attention. Keeps Birds away from your dock or garden as a scarecrow. Or decoy for hunting Geese and Mallards.
