- High quality Inks used to resist fading
- Made of Tyvek
- Pkging – White Tubes

**Assembled**

- Remove from package
- Peel two-faced tape press body together
- Install spar across wings
- Attach swivel and line
- Ready to Fly in minutes
- Line not included

**Eagle Assembled 36.99 ea**  
**Eagle Unassembled 31.99 ea**  
Wing Span 60"

**Unassembled**

The unassembled bird comes on a flat sheet in a 3" diameter tube. You punch out the pieces of the kite and glue together (we recommend Jackite glue).

It takes over an hour to assemble and comes with pictured instructions. You will need scissors and a stapler.

	<p>The <b>16 ft Bamboo Poles</b> are three sections that joint together. When apart the three sections side by side are 60 inches long. There is an eyelet at the top to attach a Jackite Line Rig or line of your choice.</p> <p>Cannot be used with the American Bald Eagle or the Giant Canada Goose but is perfect for all our other kites.</p>
	<p>The <b>Fiberglass poles</b> were designed with quality and price in mind. Jackite changed the standard for fiberglass poles in three ways:</p> <ol style="list-style-type: none"><li>1) reinforced the butt section so it would not split</li><li>2) increased the wall thickness for less breakage, and most important</li><li>3) began to provide poles with a thicker tip.</li></ol> <p>Fiberglass poles are telescoping like an antenna. You extend the fiberglass pole out and twist the sections together to the desired length. For a shorter length pole, do not extend all the pole's sections. All fiberglass poles collapse to 46 inches.</p> <p>See below price list for sizes and pricing</p>
	<p style="text-align: center;"><b>Platinum Poles</b></p> <p>Stronger poles which when extended can flex to 180 degrees for banners, windblades and windfeathers. Thicker wall for a stronger pole. This pole has a solid fiberglass tip section with a D-ring at the top and a hook on the butt section. Collapsed length 55 inches</p> <p>See below price list for sizes and pricing</p>

#### Flat Deck Mount

Mount this to any vertical post, like a deck or fence post.  
Can be installed on the bumper of an RV, van or car.

Fits the 16' and 20' standard Pole and the 27' Platinum Pole  
SPECIFY SIZE WHEN ORDERING

#### Ground Stake

14 and 16 Foot Bamboo Poles  
13, 16 and 20 foot Fiberglass Poles

Ground Stake is a 22" piece of PVC pipe with an angle cut on one end. This pole holder can be pushed into soft dirt or sand. You insert Pole into this ground stake to keep the pole vertical for flying Birds like a windsock. The pole can be removed and reinserted into the pole holder for quick storage of poles.

SPECIFY SIZE WHEN ORDERING

#### Side Deck Mount

Made of metal and painted white. Can be spray painted any color. Install on any vertical post like a deck or fence post. Install on a RV, car or van bumper.

Fits the 16', 20' & 27' standard Pole and the 27' Platinum Pole  
SPECIFY SIZE WHEN ORDERING

#### Wall Mount

This mount can be screwed to any surface including wood, metal or block including fence post, cinder block walls or the side of a trailer or RV.

This item requires a Ring; one comes free with your order. The Ring wraps around the Fiberglass Poles and snugly holds the pole in place. Rings for 13', 16', 20', 28' & 31' Poles.

Understand that different manufacturers produce poles of different diameters. If you have a different pole you may guess the ring and if not an exact fit alter the ring for best fit.

SPECIFY SIZE WHEN ORDERING

	<p style="text-align: center;"><b>Fiberglass Windssock Arm</b></p> <p>This Arm is used to keep the line from wrapping around the Fiberglass Poles. This Arm <b>does not</b> fit the Bamboo poles and we are not sure if it fits other manufacturer's poles. To use, force the white plastic sleeve over the tip of the fiberglass pole. Attach the line to the loop at the end of the wire.</p>
	<p style="text-align: center;"><b>Conduit Windssock Arm</b></p> <p>Purchase from a hardware store a 1/2" by 10 foot piece of pvc pipe and push this conduit arm into the pvc pipe. 1/2" pvc fits many flag brackets/holders or the pipe can be attached to a fence post, deck railing or pushed into soft ground. You can shorten the pvc simply by cutting it with any saw. Glue in conduit arm for added strength.</p>
	<p style="text-align: center;"><b>150 ft of Line on Handle</b></p>
	<p style="text-align: center;"><b>Line Rig - 7 ft strong line with swivels</b></p> <ul style="list-style-type: none"> <li>• 7 feet of strong lightweight line with big swivels on each end.</li> <li>• For Osprey, Loon, Happy Gull, Dove, Eagle, or Goose Kites</li> <li>• Fly with pole 13 feet or taller.</li> <li>• Designed to minimize line winding around pole.</li> </ul> <p>Attach swivel to top of your pole, and the other swivel to your Flying Bird.</p>

## General Information

### Flying Birds

- Constructed of durable Tyvek.
- Water & tear resistant.
- Flies as a Kite, Windsock, Decoy or Scarecrow.
- Display as a mobile or use for a Decoy Actually attracts other birds.
- People will insist you have a bird tied to a String. Guaranteed for 30 days.
- Made in the USA Hung indoors or outdoors, it make an attractive decoration.
- High Quality, fade resist dyes used for imprinting.

### Poles

Fiberglass poles were designed with quality and price in mind.

Poles changed the standard for fiberglass poles:

- 1) reinforced the butt section so it would not split
- 2) increased the wall thickness for less breakage, and most important
- 3) began to provide poles with a thicker tip.
- 4) The Jackite Fiberglass poles are telescoping like an antenna.
- 5) You extend the fiberglass pole out and twist the sections together to the desire length.
- 6) For a shorter length pole, do not extend all the pole's sections.
- 7) All fiberglass poles collapse to 46 inches.

### Platinum Poles

Stronger poles which when extended can flex to 180 degrees for banners, windblades and windfeathers.

Thicker wall for a stronger pole.

This pole has a solid fiberglass tip section with a D-ring at the top and a hook on the butt section.

Collapsed length 55 inches

Expect new colors next year

Jackite, designers of unique Birds (Kites/Windsocks) that truly depict a bird in flight. They beat their wings, bank on the air emulating a real bird. Fly outside your store like a windsock for added attention. Keeps Birds away from your dock or garden as a scarecrow. Or decoy for hunting Geese and Mallards.
